turned to thick stout pupae. Abdomen small tapering. Dark brown, the cases a little greenish. Body coarsely punctured, cases shagreened as if irregularly eroded; abdominal segments ridged in front. Cremaster a long spine, widened at base and with two recurved hooks at tip.

Food plant probably locust (*Robinia pseudacacia*); at least the larvae fed readily on this plant and the moths were taken flying among the trees. Eggs June 10th, mature larvae July 10th. Single brooded, the fall and winter being passed as pupa. Larvae from Washington, D.C.

THE KATYDID'S CALL IN RELATION TO TEMPERATURE.

The following observations on the frequency with which the call of the Katydid (*Corythucha puncticollis*) is repeated and their relation to the temperature at the time were made in Milton, Mass., by Mr. Roland Hayward, between August 26th and October 7, and are here printed from his memoranda. The first column gives the date, the second the temperature in degrees of the Fahrenheit scale, the third the number of calls "kati-
did" or "she did" per minute. In all cases they were counted for at least one minute.

PROCEEDINGS OF THE CLUB.

11 January, 1901. The 217th regular and 24th annual meeting (since incorporation) was held at 156 Brattle St., Mr. A. P. Morse in the chair.

The annual reports of the officers were read. The following officers were elected for 1901: secretary, Roland Hayward; treasurer, Roland Hayward; librarian, Samuel H. Scudder; members at large of executive committee, A. P. Morse, S. H. Scudder.

The annual address of the retiring president, J. W. Folsom, was read, entitled: The distribution of holarctic Collembola,—published in full in Psyche.
A NEW VOLUME OF PSYCHE

began in January, 1900, and continues through three years. The subscription price (payable in advance) is $5.00 per volume, or $2.00 per year, postpaid. Numbers are issued on the first day of each month. Libraries and individuals generally ordering through subscription agencies (which only take annual subscriptions) will please notice that it is cheaper to subscribe for the entire volume at once directly of us.——Any early volume can be had for $5.00, unbound. Address Psyche, Cambridge, Mass.

Vols. 1-8, Complete, Unbound - - - - - - $37.00.
Vols. 1-8, and Subscription to Volume 9 - - - - $41.00.
Vol. 8 contains about 450 pp. and 8 plates, besides other illustrations.

Published by Henry Holt & Co., New York.

Scudder's Brief Guide to the Commoner Butterflies.

By Samuel H. Scudder. xi + 206 pp. 12mo. $1.25.

An introduction, for the young student, to the names and something of the relationship and lives of our commoner butterflies. The author has selected for treatment the butterflies, less than one hundred in number, which would be almost surely met with by an industrious collector in a course of a year's or two year's work in our Northern States east of the Great Plains, and in Canada. While all the apparatus necessary to identify these butterflies, in their earlier as well as perfect stage, is supplied, it is far from the author's purpose to treat them as if they were as many postage-stamps to be classified and arranged in a cabinet. He has accordingly added to the descriptions of the different species, their most obvious stages, some of the curious facts concerning their periodicity and their habits of life.

Scudder's The Life of a Butterfly. A Chapter in Natural History for the General Reader.

By Samuel H. Scudder. 186 pp. 16mo. $1.00.

In this book the author has tried to present in untechnical language the story of the life of one of our most conspicuous American butterflies. At the same time, by introducing into the account of its anatomy, development, distribution, enemies, and seasonal changes some comparisons with the more or less dissimilar structure and life of other butterflies, and particularly of our native forms, he has endeavored to give, in some fashion and in brief space, a general account of the lives of the whole tribe. By using a single butterfly as a special text, one may discourse at pleasure many; and in the limited field which our native butterflies cover, this method has a certain advantage from its simplicity and directness.

A. Smith & Sons, 146-148 William St., New York. Manufacturers and importers of Goods for Entomologists, Klaeger and Carlsbad Insect Pins, Setting Boards, Folding Nets, Locality and Special Labels, Forceps, Sheet Cork, etc. Other articles are being added. Send for list.

Subscribers to Psyche in arrears will confer a favor by prompt payment of bills.
